## **FIFTY YEARS OF TRAVAUX DU MUSÉUM NATIONAL D'HISTOIRE NATURELLE "GRIGORE ANTIPA"**

MIHAELA BARCAN ACHIM

Abstract. The paper presents the authors and the fields they approached along the 50 years of *Travaux*'s existence.

Résumé. Le travail présente les auteurs et leurs domaines d'étude au long de 50 ans de l'existence de *Travaux*.

Key words: *Travaux du Muséum National d'Histoire Naturelle "Grigore Antipa"*, București (Bucharest), authors, systematics, faunistic, morphology, anatomy, histology, physiology, biochemistry, biophysics, molecular biology, biology, ecology, zoogeography, geology, palaeontology, museology, history of science, anniversaries, commemorations, reviews.

### INTRODUCTION

Fifty years since *Travaux* was released in the scientific world already passed. More or less sensitive, this journal reflected not only the activity carried on by "Grigore Antipa" National Museum of Natural History (București) but also the scientific life of Romania and of the world.

This paper wants to point out the huge quantity of information which is included in this journal. It is a brief history of fifty years of natural sciences. In it there are great names of Romanian biology, important papers written by Romanian and foreign scientists and especially, important data, which now are the base for the present and future papers. But this is not the first attempt.

In 1975, the ex-editorial secretary of the journal, Matei Tâlpeanu, made such a synthesis for the first 15 volumes. He continued it, presenting a similar paper in the volume XX (Tâlpeanu, 1979), covering the next five volumes. After several years, in 2003, I thought to continue Mr. Tâlpeanu's idea and published a paper which covers the information from the next 25 volumes, released between 1980 and 2003 (Barcan Achim, 2003).

In 2007, *Travaux du Muséum National d'Histoire Naturelle "Grigore Antipa"* celebrated its 50 anniversary. Getting Mr. Matei Tâlpeanu's approval, I decided to publish the entire collection of our journal, from its very beginning till now. Of course, these data can be the base for a special web site. But because this site is under construction and it will be finished sooner or later, I present all the authors who honoured us publishing here and their fields of activity in a written support.

Old fashioned or not, this paper wants to be a practical instrument for those interested in the data published in our journal.

For the sake of syntheses, here it is some figures regarding strictly the journal from the editorial point of view: fifty volumes of *Travaux* means 25,104 pages, 2,939 papers, 106 foreign authors from 33 countries, around 700 species new to science and around 2,200 new reports for the Romanian fauna.

CINCIZECI DE ANI DE *TRAVAUX DU MUSÉUM NATIONAL D'HISTOIRE  
NATURELLE "GRIGORE ANTIPA"*

REZUMAT

Această lucrare dorește să sublinieze imensa cantitate de informație care există în această revistă. Este o scurtă istorie a cincizeci de ani de zoologie românească. În ea întâlnim mari nume ale biologiei românești, lucrări importante ale cercetătorilor români și străini precum și date importante care pot constitui baza unor lucrări prezente și viitoare. Dar aceasta nu este prima lucrare de acest gen.

În 1975, fostul secretar de redacție al revistei, Matei Tâlpeanu a publicat o astfel de sinteză pentru primele 15 volume. El a continuat-o într-o lucrare similară în volumul XX, care acoperă autorii și lucrările publicate în următoarele cinci volume. După câțiva ani, în 2003 am hotărât să continui ideea d-lui Tâlpeanu și am sintetizat informația din urătoarele 25 de volume. Acum, într-un an omagial pentru *Travaux* această lucrare prezintă autorii din toți cei 50 de ani de existență. Primind acordul d-lui Tâlpeanu am reluat totul de la volumul I și am actualizat informația până la volumul L. Aceasta va fi și ultima lucrare de acest gen pentru ca site-ul revistei, acum în lucru, va cuprinde toată această informație, ușurând căutările celor interesați.

ACKNOWLEDGEMENTS

I want to thank to Dr. Ileana Negoescu for her permanent support.
